Senior Java/JavaScript Software Engineer with proven experience spanning more than 5 years in the fintech and telecommunications sectors, building and supporting high performance microservice architectures for insurance, financial and telecom companies. With proven success in **Tech Lead** and **Team Lead** roles, with a passion for leveraging technology and continuous learning to deliver scalable, effective solutions.

EXPERIENCE

SENIOR SOFTWARE ENGINEER

Sofrecom Tunisia

Jan 2024 - PRESENT

- Collaborated on a multi-team high-performing microservice project using the latest web technologies, ensuring scalability, reliability, and optimal performance while adhering to best practices and Agile methodologies.

FULL STACK WEB DEVELOPER

Satoripop Tunisia

Jul 2020 - Dec 2023

- Orchestrated the development of a sophisticated tax registration system in collaboration with a cross-functional team of 5, including developers, UI/UX designers, QA specialists, and a product owner.
- Played a pivotal role as the lead backend developer in constructing an insurance subscription application within a multifaceted ecosystem of applications for AMI Assurance TN. Led a team of over 10, leveraging my skills to contribute significantly to the project's success.
- Contributed extensively to developing an e-commerce solution specifically designed for Carrefour Tunisia. Actively facilitated multiple scrum events, fostering effective teamwork and ensuring streamlined development processes.
- Engaged in every stage of the software development life cycle, including design, architecture, backlog management, UX design, coding, testing, continuous integration and delivery, as well as comprehensive documentation.
- Mentored junior developers and provided code reviews, empowering them to grow and excel in their roles.

WEB DEVELOPER

Apeiron Technologies

Jul 2019 – Jun 2020

- At Apeiron Technologies, I excelled in crafting high-performing and user-focused websites, precisely tailored to meet the organization's business objectives.
